

Council Working Group on international Internet-related public policy issues

Third meeting – Geneva, 11-12 November 2013

Document WG-Internet-3/8-E
5 November 2013
English only

Saudi Arabia

POLICY STATEMENTS ON THE ISSUES IN THE OPEN CONSULTATION

Following the 2nd meeting of the CWG-Internet, an open consultation was held on three issues:

1. Effectively combating and countering spam;
2. International public policy issues concerning IPv4 addresses; and
3. Developmental aspects of the Internet.

A total of 32 responses were received. Most were thoughtful and informative contributions on the issues. Saudi Arabia encourages all Member States to consider the three issues, taking into account the responses to the open consultation as appropriate, and to prepare proposed policy statements on these issues for discussion and approval at the next meeting of the CWG.
